About the Conference

During recent years, the concept of pedagogy has gained more attention than ever before in teaching and learning process of English. Because the pedagogical thought and framework in teaching English highlight the characteristics of multiculturalism, modernity, urbanism, migration of language learners from rural areas. This, in turn, defines its new borders and limitations compared to the deep-rooted traditional models of education. So there is a need for the creation of a broader epistemological structure of Pedagogy.

The conference aims to put forward the current trends in Teaching English Language and Literature by promoting research and highlighting new paradigms,
